492 Weekly Report 13

Team: Dec15-13
Date: 9/12/15
Advisor: George Amariucai
Project: Ad Hoc Mobile Network
Members: Cole Cummings
               Cody Lougee
               Ethan Niemeyer

Summary

This week we are working on getting tables into the project so that data will persist and working on DSR logic.

Group Meeting Notes

We mostly all just worked on our parts and discussed Swift and the logic of joining the network and groups.

Advisor Meeting Notes

Discussed secure groups using the app and how that would be handled.
How we will test, probably begging for iphones.
When a node enters the network it will need to establish some way of knowing who it can talk to.

Accomplishments

This week we all looked through the old project and our work and reacquainted ourselves with swift.
An update had broken the app but it is fixed now.

Plans For Next Week

Cole - get tables into the app
Cody - Better testing ideas/Basic Networking
Ethan - Work on DSR

Pending Issues

Figuring out how to assign unique IDs for each node.

Individual Contribution

Team Member	Hours	Descriptions
Cole Cummings	3	learning swift, moving tables into prototype
Cody Lougee	3	networking code, learn more swift
Ethan Niemeyer	2	Reminder of Swift

Total Contribution

Team Member	Hours
Cole Cummings	40
Cody Lougee	43
Ethan Niemeyer	40
