492 Weekly Report 19

Team: Dec15-13
Date: 10/24/15
Advisor: George Amariucai
Project: Ad Hoc Mobile Network
Members: Cole Cummings
               Cody Lougee
               Ethan Niemeyer

Summary

This week was spent mostly fixing bugs and making some progress on the UI and backend.

Group Meeting Notes

Group was unable to meet

Advisor Meeting Notes

Talked about how we could pre-establish groups and encryption keys if devices are directly connected to each other. For example, a group could meet up before splitting up and establish an encrypted group together.

Accomplishments

Screens split into multiple view controllers to avoid errors

Plans For Next Week

Get Friends Screen done
Get Group selection screen done
Get chat screen and CoreData model started

Get back end code into repo

Pending Issues

None

Individual Contribution

Team Member	Hours	Descriptions
Cole Cummings	6	Views were getting errors loading different elements, split the views into multiple files to fix this. Added CoreData elements for Friends
Cody Lougee	4	Planned out further how the UI should flow and what the screens should look like. Experimented with different UI models.
Ethan Niemeyer	2	Started working on groups for backend

Total Contribution

Team Member	Hours
Cole Cummings	64
Cody Lougee	59
Ethan Niemeyer	58
