Project: Ad Hoc Mobile Network

Summary

The main goals this week were to start getting familiar with our project and contact our advisor. We set up a weekly meeting with our advisor George Amariuca based on a time where every team member was available. Our team also started delegating project roles to each team member. It took more time than expected to coordinate schedules and get in touch with Amariuca, so we were not able to meet with him this week, but will begin weekly meetings starting next week.

Group Meeting Notes

First meeting with our advisor will happen Thursday, January 29th.
Still setting up a time for meeting/working with group members.

Advisor Meeting Notes

No advisor meeting this week.

Accomplishments

- Create code repositories on Iowa State's Gitlab server for the project and project web site.
- Organize a weekly meeting with our advisor.
- Delegate roles to team members.

Plans For Next Week

Set up meeting with our group and begin to familiarize ourselves with technologies needed for the project.
